Cyber Threats Are Outpacing Africa's Defenses.

Cybercrime cost Africa over **\$4 billion in 2023** (Interpol).

Africa's cybersecurity gap is a **\$10B opportunity for...**

 **Innovation**

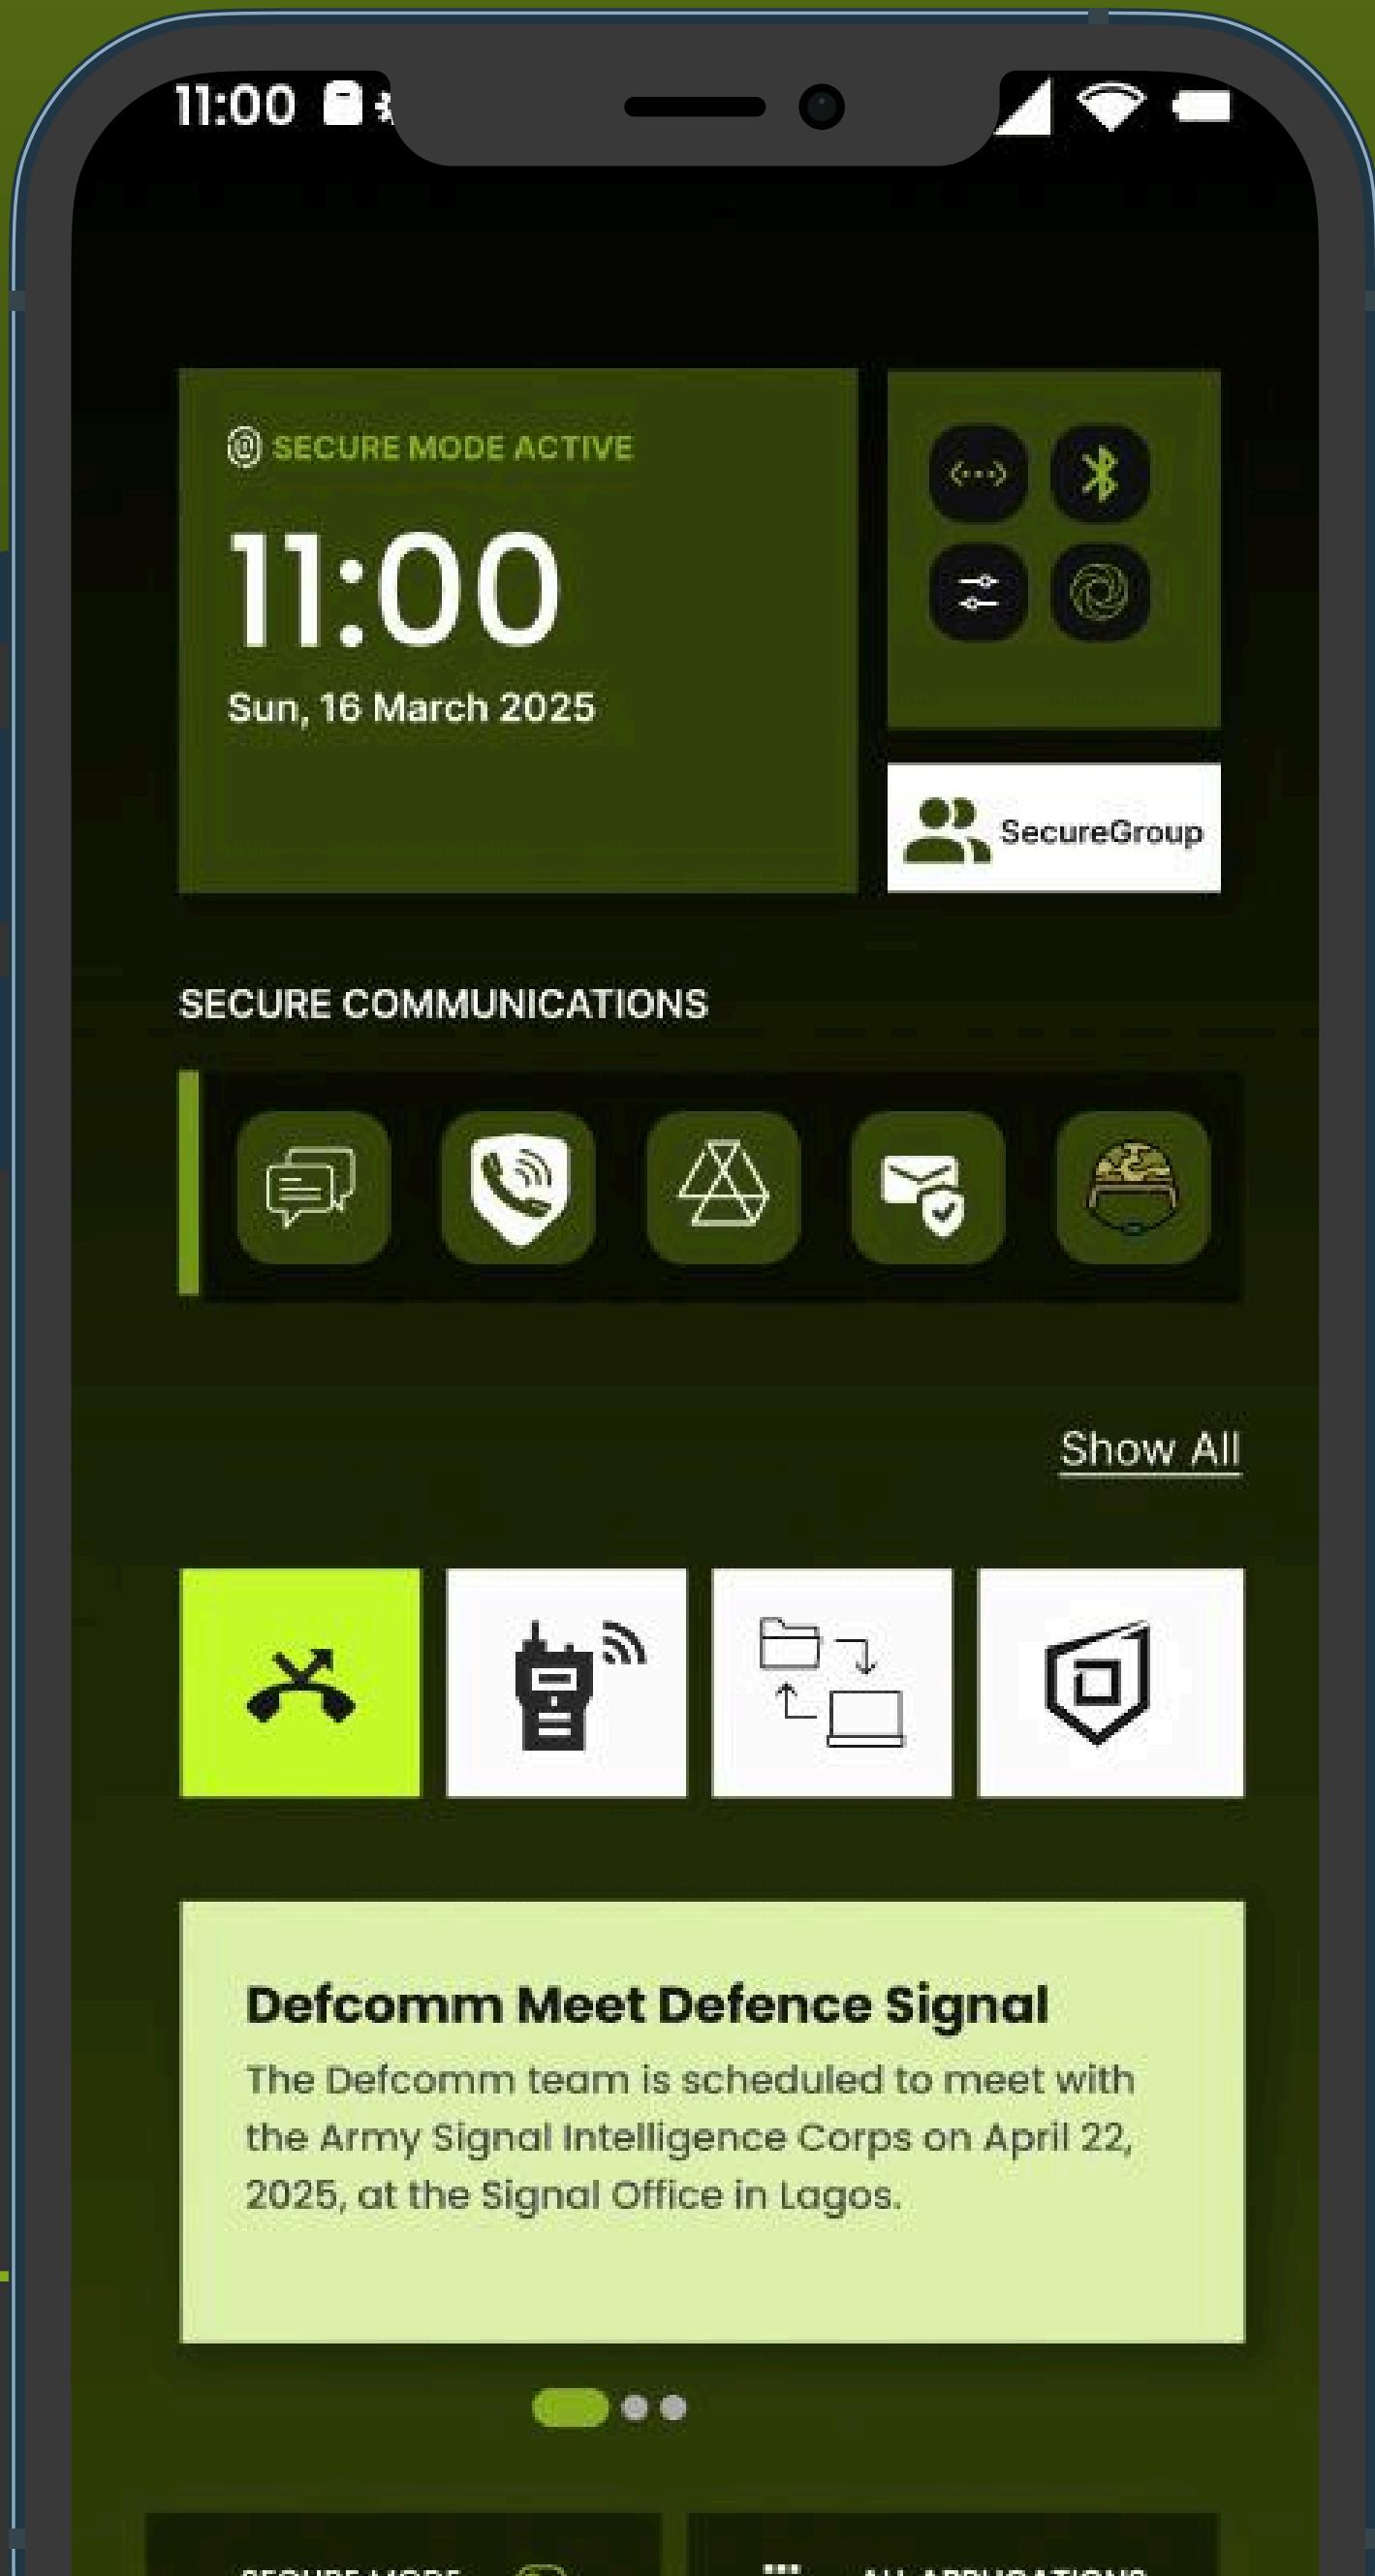

Investment

Digital sovereignty

About DefComm

- Proof of concept successfully tested.
- Partnerships with defense and academic institutions.
- GRC and encryption standards aligned with NATO-class frameworks.

Africa Defence Tech Innovation Programme

Operation Iron Shield

Operation Iron Shield is the flagship cybersecurity and defence innovation programme of African Defence Tech, designed as a high-impact platform for strengthening Nigeria's digital defence capabilities. It combines three critical layers of defence technology.

- **Encrypted Communication Systems:** Secure voice, chat, and mission data exchange.
- **Defcomm Secure OS:** Custom defense operating system for privacy and intelligence-grade operations.
- **Autonomous Drone Security Frameworks:** Encrypted command and telemetry protocols.
- **Defcomm Privacy Phone:** Military-grade mobile privacy and data protection.

The programme integrates bounty testing, live demonstrations, and innovation exhibitions.

Bringing together innovators, government institutions, cybersecurity engineers, and satellite technology companies to collaborate and showcase defence capabilities.

OBJECTIVES

1

IDENTIFY
VULNERABILITIES

2

STRENGTHEN
INFRASTRUCTURE.

3

BUILD TRUST IN
INDIGENOUS
TECHNOLOGY.

PARTICIPANTS: ETHICAL HACKERS, CYBERSECURITY EXPERTS,
ACADEMIA AND GOVERNMENT REPS.

DURATION: 2 DAYS

Impact & Reach

10,000+

CYBERSECURITY
PROFESSIONALS
ENGAGED GLOBALLY.

50+

Institutional and
industry participants.

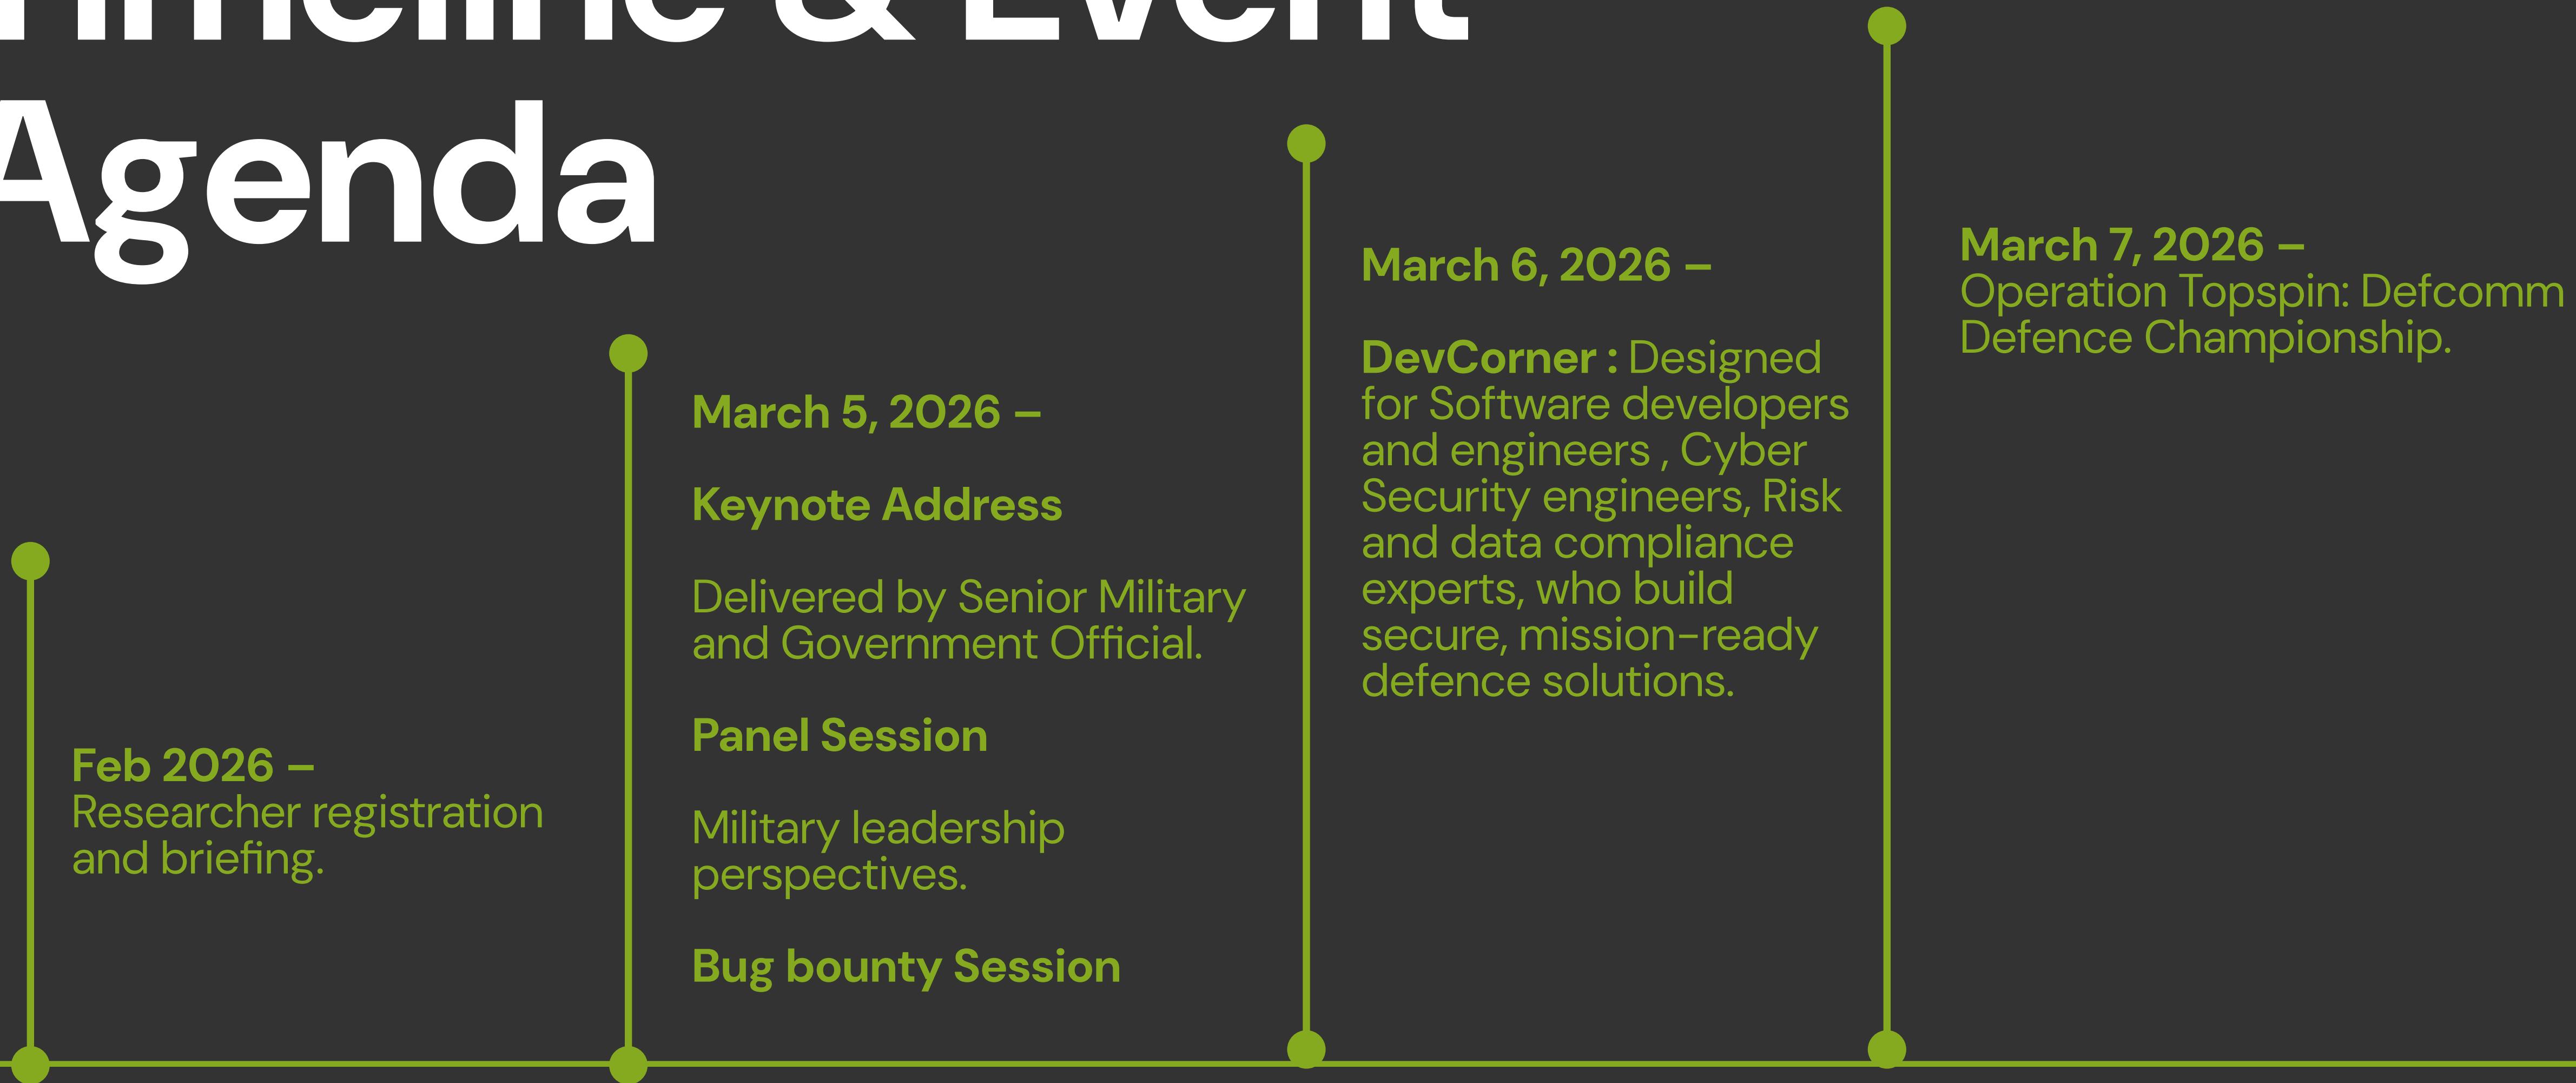

10+

vulnerabilities expected
to be discovered and
resolved.

20+

media outlets and
partners covering the
event.

Timeline & Event Agenda

Invitation for Distinguished Cyber Leaders in Defense and Government.

Bug Bounty Programme

OPERATION IRON SHIELD

THEME
**SECURING COMMUNICATIONS,
SYSTEMS, AND SKIES.**

Thanks for playing, the table awaits our next match...

Operation Iron Shield 2026

Sponsorship & Exhibition Framework

1 Strategic Partner (In-Kind Support)

Contribution: Hardware, cloud hosting, satellite bandwidth, or security tools

Exhibition Zone: Technical Command Pod

Concept: An immersive lab environment featuring the partner's technology in active use during live demos.

Pre-Event Benefits

- Branding aligned with the value of contribution
- Logo inclusion on website and select promotional materials
- Joint announcement or social feature confirming partnership
- Mention in all event publications and marketing campaigns

During Event Benefit

- Recognition as Technical Collaborator
- On-site showcase of provided technology (Command Pod signage)
- Panel or talk slot related to contributed tech
- Logo placement on venue banners, screens, and livestream graphics

Post-Event Benefits

- Inclusion in the post-event report and debrief
- Social acknowledgment of contribution
- Opportunity to highlight performance in challenge recap
- Video/photo assets featuring your tech in action

Operation Iron Shield 2026

Sponsorship & Exhibition Framework

2
